Door panel

NVE-VDB200

The additional door panel **NVE-VDB200** is a device designed mainly for single-family houses for installation at the entrance to the property. It can also be used as an additional, simple entrance panel in a larger system. It easily allows you to communicate with the building owner using the bell button and the built-in camera. Simple installation connecting the panel directly to the NVE-M200 subscriber monitor and power supply at home significantly reduces the cost of the whole system and creates a very attractive set for this type of objects.

Device type	Additional door panel
Additional functions	volume control, mounting on a stand, LED IR
Operating temperature	from -40 to 55 °C
Dimensions	128 x 44 x 60 mm
